Dear Mr Stacey:

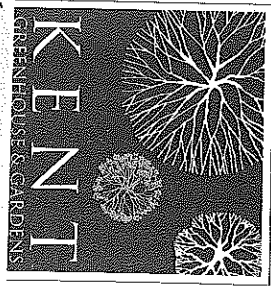

I have been following the DEP's review of the streamflow regulations. I am very pleased that the state and federal government are taking water so seriously. If we don't protect our rivers and streams now, we are inviting a problem of huge proportions for the future.

I support the new regulations and would be loathe to see them weakened. Further, I agree with many that support the provision that would eliminate the Class 4 division for streams. All our waters need supervision. Thank you for all your attention to this weighty matter.

Most sincerely,

Deborah A Bennett
